

Alarm Clock Problem Statement

Author: Owen Coulam

Problem Statement

- For many college students, an alarm clock doesn't fully wake them up for class due to its snooze and mute options.

What is the problem?

- The problem is how traditional alarm clocks or phone alarms fail to guarantee that a student wakes up for class, since a student can just hit snooze or mute and keep sleeping rather than listen to the alarm and fully wake up.

Why does it matter?

- Sleeping through alarm clocks means that a student might miss an important class, therefore negatively affecting his or her grade.
